

# WANTED

**Bicycle mechanic / -mechatronics engineer, or  
Bicycle master mechanic (m/f/d)**  
full time with work experience

We are one of the leading distributors of high quality tricycles in Germany. Based on the customers selection from our modular system, our trikes are built in our assembly department and then shipped to the retailer. Additionally, we're distributing trike accessories across Europe through our webshop. Our team consists of ten employees and we'd very much like to get to know you.

**Your areas of responsibility:**

- Complete assembly of high quality recumbent tricycles with increasing focus on electronic assist drives, based on our modular system
- Inspection of all incoming parts and components
- Trade show support

**You should provide:**

- Experience as a bicycle mechanic, bicycle mechatronics engineer, bicycle technician, bicycle assembler or a comparable apprenticeship
- Skills in working with high quality shifting components, hydraulic braking systems as well as the Shimano Steps E-Assist system
- Wheel building know how
- Self starter, hand on, attention to detail
- Fluent in English or German language

## **We're offering you:**

- A young team with flat hierarchies and an open company culture
- A well equipped workshop with room for your own design ideas
- The possibility to codesign workflow and working processes and to increasingly take on responsibility
- An indefinite contract with flexible working times from Monday to Friday
- An attractive salary plus benefits in kind
- A traffic-favorable location, well reachable by bus or train from Darmstadt, Frankfurt, or the surrounding area
- Support for finding accomodation in the Rhein-Main area

***We're not looking for the best application,  
we're looking for the best mechanic.***

Please get in touch with us via mail, phone or WhatsApp and introduce yourself with your qualifications, expected salary and the earliest starting date.
